SHOUTrds 2.1 Released!

SHOUTrds 2.1 is available for download! (See the patches section).

Changes:

Creating a schedule on all days showed an "# is not a valid integer value" error.
The progressbar could get "out of range" after 23:59h
The last three columns in the scheduler form are now hidden.
SHOUTcast didn't accept passwords containing special characters.
It's now possible to change the way \$ots\$ is shown.
